

Neeraj Singh

DevOps & Cybersecurity Engineer

Cloud Security • Threat Detection • CI/CD Automation

📍 Delhi NCR, India | 📞 +91 7988815263 | ✉️ neerajlovecyber@gmail.com | 🔗 [linkedin.com/in/neerajlovecyber](https://www.linkedin.com/in/neerajlovecyber)

Summary

DevOps and Cybersecurity Engineer with 2+ years of combined professional and internship experience securing cloud-native systems across **AWS**, Linux, CI/CD, and containers. Strong in **GitHub Actions**, **Docker**, **Kubernetes**, **Terraform**, **Ansible**, **Wazuh SIEM**, SOC triage, vulnerability assessment, centralized logging, and security automation. Known for clear **communication**, careful incident documentation, cross-functional **teamwork**, and ownership of remediation follow-through.

Skills

DevSecOps • Wazuh SIEM • SOC Triage • Incident Response • Threat Containment • Vulnerability Assessment • Security Auditing

AWS • CI/CD Pipelines • GitHub Actions • Docker • Kubernetes • Terraform • Ansible • Linux Administration

ELK/OpenSearch • Centralized Logging • Python Scripting • Shell Scripting • YARA • DNS/TLS Security • Platform Security Communication • Teamwork • Ownership • Incident Documentation • Stakeholder Updates • Remediation Follow-Through

Professional Experience

Cybersecurity & DevOps Engineer

xloTz Private Limited | 📍 Remote, Delhi NCR | Company base: Bengaluru

📅 Nov 2024 – Present

- **Secure Cloud Operations:** Co-designed a cyber assurance platform on **AWS EC2**, improving visibility for **10 cloud workloads** through provisioning, hardening, logging, monitoring, and security controls.
- **Infrastructure Automation:** Built reproducible Windows/Linux deployment workflows, reducing setup drift through scripted health checks, configuration baselines, and repeatable controls.
- **Threat Detection & Response:** Created custom **Wazuh Active Response** modules to automate containment, isolation, and remediation while reducing manual response steps.
- **Security Automation & Risk Auditing:** Built workflows for asset discovery, baseline checks, evidence collection, and remediation tracking; documented findings and partnered with engineers.

Automation & CI/CD Intern

Frugal Testing | 📍 Hyderabad, India

📅 2023 – 2024

- **Secure Pipeline Automation:** Implemented **CI/CD** pipelines with **GitHub Actions**, adding repeatable checks and release validation while reducing manual deployment overhead by **30%**.
- **Containerization & Orchestration:** Containerized test environments with **Docker** and automated distributed suite execution on **Kubernetes**, enabling **parallel test runs** and improving release validation consistency by **30%**.
- **Automation & Release Visibility:** Programmed web/API validation with **Java**, **Selenium**, and **Postman**; collaborated with QA/engineering in **Jira** and shipped **Slack** alerts.

Projects

Cyber Assurance Platform — Unified **SOC & CSPM** Layer, Developed an AWS-based security operations plane for detection, triage, centralized logging, cloud posture checks, workload telemetry, secure retention, and event queues using **Docker**, **Valkey/Redis**, and **ELK/OpenSearch**.

WatchTower Security Scanner — Instant Domain Risk Scorecard, Built a domain scanner that audits **DNS**, **TLS**, HTTP headers, WAF exposure, open ports, WHOIS, blocklists, vendors, and threat signals; generates security grades, weighted scores, severity counts, vendor scorecards, and actionable findings.

Security Audit360 — Baseline & Audit Console, Developed a security audit application for 40+ digital asset signals including DNS, domains, public IPs, and SSL/TLS certificates; generated baseline risk reports for compliance, exposure review, and operational remediation.

Certificates

🌟 **Certified Ethical Hacker (CEH)**

By EC-Council

🌟 **Jr. Penetration Tester (eJPT)**

By eLearnSecurity

🌟 **AWS & DevOps Fundamentals**

By KodeKloud

Education

Bachelor of Technology in Computer Science and Engineering | CGPA – 8.29

Lovely Professional University | 📍 Punjab

📅 Aug 2020 – Oct 2024
