

Neeraj Singh

Cybersecurity Engineer

Threat Detection • Vulnerability Assessment • Incident Response

📍 Delhi NCR, India | 📞 +91 7988815263 | ✉️ neerajlovecyber@gmail.com | 🔗 [linkedin.com/in/neerajlovecyber](https://www.linkedin.com/in/neerajlovecyber)

Summary

Cybersecurity Engineer with **2+ years of combined professional and internship experience** in threat detection, SOC triage, vulnerability assessment, incident response, and cloud security monitoring. Strong in **Wazuh SIEM**, log analysis, threat containment, DNS/TLS security, Linux hardening, web/API security validation, and remediation tracking.

Skills

Wazuh SIEM • SOC Triage • Incident Response • Threat Containment • Vulnerability Assessment • Log Analysis • Security Auditing

DNS/TLS Security • Linux Hardening • Web/API Security Validation • Security Baselines • Remediation Tracking • Risk Reporting

ELK/OpenSearch • YARA • Python/Shell Scripting • Burp Suite • Nmap • Postman • Incident Documentation

Professional Experience

Security Engineer

xloTz Private Limited | 📍 Remote, Delhi NCR | Company base: Bengaluru

📅 Nov 2024 – Present

- **Threat Detection Platform:** Co-designed a cyber assurance platform, improving visibility for **10 cloud workloads** through **Wazuh** monitoring, log centralization, and alerting.
- **Security Baselines:** Built Windows/Linux security baselines with scripted health checks, configuration validation, and repeatable controls to reduce drift.
- **Incident Response Automation:** Created custom **Wazuh Active Response** modules to automate containment, isolation, and remediation while reducing manual response steps.
- **Vulnerability & Risk Auditing:** Built workflows for asset discovery, baseline checks, evidence collection, and remediation tracking.

Security Testing & Automation Intern

Frugal Testing | 📍 Hyderabad, India

📅 2023 – 2024

- **Security Validation:** Built repeatable web/API validation checks for authentication flows, API behavior, and regression risk, reducing manual verification by **30%**.
- **Controlled Test Environments:** Used isolated environments to validate security-sensitive web/API changes, enabling parallel runs and improving consistency by **30%**.
- **Defect Triage & Reporting:** Programmed web/API checks with **Java**, **Selenium**, and **Postman**; tracked security-relevant defects in **Jira**.

Projects

Cyber Assurance Platform — Unified **SOC & Cloud Security Layer**, Developed a security operations plane for detection, triage, centralized logging, cloud posture checks, workload telemetry, and retention using **Wazuh** and **ELK/OpenSearch**.

WatchTower Security Scanner — Domain Risk Scorecard, Built a scanner for **DNS**, **TLS**, HTTP headers, WAF exposure, open ports, WHOIS, blocklists, and threat signals; generates grades, scores, and findings.

Security Audit360 — Baseline & Audit Console, Developed an audit app for 40+ digital asset signals including DNS, domains, IPs, and SSL/TLS certificates; generated baseline risk reports.

Certificates

🌟 **Certified Ethical Hacker (CEH)**

By EC-Council

🌟 **Jr. Penetration Tester (eJPT)**

By eLearnSecurity

🌟 **AWS Cloud Security Fundamentals**

By KodeKloud

Education

Bachelor of Technology in Computer Science and Engineering | CGPA – 8.29

Lovely Professional University | 📍 Punjab

📅 Aug 2020 – Oct 2024
