

Neeraj Singh

DevOps Engineer

CI/CD Automation • Cloud Operations • Containers & IaC

📍 Delhi NCR, India | 📞 +91 7988815263 | ✉️ neerajlovecyber@gmail.com | 🔗 [linkedin.com/in/neerajlovecyber](https://www.linkedin.com/in/neerajlovecyber)

Summary

DevOps Engineer with **2+ years of combined professional and internship experience** building reliable cloud, automation, and release workflows across **AWS**, Linux, CI/CD, and containerized environments. Strong in **GitHub Actions**, **Docker**, **Kubernetes**, **Terraform**, **Ansible**, scripting, centralized logging, monitoring, and deployment validation. Experienced in adding security-aware checks and operational visibility to delivery pipelines.

Skills

AWS • Linux Administration • CI/CD Pipelines • GitHub Actions • Docker • Kubernetes • Terraform • Ansible
Infrastructure Automation • Release Validation • Deployment Workflows • Configuration Baselines • Health Checks •
Environment Provisioning
ELK/OpenSearch • Centralized Logging • Monitoring • Python Scripting • Shell Scripting • Postman • Jira
Communication • Teamwork • Ownership • Documentation • Stakeholder Updates • Operational Follow-Through

Professional Experience

DevOps Engineer

xloTz Private Limited | 📍 Remote, Delhi NCR | Company base: Bengaluru

📅 Nov 2024 – Present

- **Cloud Operations:** Co-designed and operated a cyber assurance platform on **AWS EC2**, improving operational visibility for **10 cloud workloads** through provisioning, logging, monitoring, and deployment controls.
- **Infrastructure Automation:** Built reproducible Windows/Linux deployment workflows, reducing setup drift through scripted health checks, configuration baselines, and repeatable environment controls.
- **Automation & Reliability:** Automated operational response workflows with **Wazuh Active Response**, reducing manual remediation steps and improving consistency across distributed workloads.
- **Operational Reporting:** Built workflows for asset discovery, baseline checks, evidence collection, and remediation tracking; documented findings and partnered with engineers.

DevOps & CI/CD Intern

Frugal Testing | 📍 Hyderabad, India

📅 2023 – 2024

- **CI/CD Pipeline Automation:** Implemented **GitHub Actions** pipelines with repeatable checks and release validation, reducing manual deployment overhead by **30%**.
- **Containerization & Orchestration:** Containerized test environments with **Docker** and automated distributed execution on **Kubernetes**, enabling **parallel test runs** and improving validation consistency by **30%**.
- **Release Visibility:** Programmed web/API validation with **Java**, **Selenium**, and **Postman**; collaborated in **Jira** and shipped **Slack** alerts for faster failure visibility.

Projects

Cyber Assurance Platform — Cloud Operations & Observability Layer, Developed an AWS-based operations plane for centralized logging, workload telemetry, retention, event queues, and release visibility using **Docker**, **Valkey/Redis**, and **ELK/OpenSearch**.

WatchTower Security Scanner — Automated Domain Audit Tool, Built a scanner that collects **DNS**, **TLS**, HTTP headers, WAF, open-port, WHOIS, blocklist, vendor, and threat-signal data with exportable findings.

Security Audit360 — Baseline & Audit Console, Developed an audit application for 40+ digital asset signals including DNS, domains, public IPs, and SSL/TLS certificates; generated baseline reports for operations review.

Certificates

🌟 **Certified Ethical Hacker (CEH)**

By EC-Council

🌟 **Jr. Penetration Tester (eJPT)**

By eLearnSecurity

🌟 **AWS & DevOps Fundamentals**

By KodeKloud

Education

Bachelor of Technology in Computer Science and Engineering | CGPA – 8.29

Lovely Professional University | 📍 Punjab

📅 Aug 2020 – Oct 2024
